

ScitoVation to Showcase ScitoSim™ AI Platform at Society of Toxicology (SoT) 2026

ScitoVation is pleased to announce its participation in the upcoming **Society of Toxicology (SoT) Annual Meeting**.

At this year's conference, we will highlight our latest advancements in AI-driven toxicology through **ScitoSim™**, our integrated platform designed to transform how scientific data is analyzed, interpreted, and translated into actionable, regulator-ready insights.

ScitoSim™ combines:

- Advanced transcriptomic analysis
- Human-relevant dose translation through PBPK modeling
- Automated, regulatory-ready reporting
- A novel **information synthesis module** capable of interpreting both structured and unstructured scientific data with full traceability and reproducibility

In collaboration with **Integral Consulting**, we are advancing next-generation risk assessment approaches that integrate modern science into real-world regulatory workflows—ensuring that decisions are not only scientifically rigorous, but also transparent, reviewable, and accepted by regulators.

 **Visit us at Booth #1916**

 **Visit our partner Integral Consulting at Booth #926**

We welcome the opportunity to connect and discuss how ScitoSim™ can help transform complex data into decisions that hold.
